

Samir El Karrat Moreno | Student Researcher

 Warsaw, Poland |  samiriyo05@gmail.com | samirkar05.github.io | LinkedIn

I am a final year (5th year) Double BSc student in Mathematics & Physics at UAB with a GPA of 8.19/10.
Computer vision researcher focusing on multimodal model merging and continual learning with 1+ years of experience including an excellence scholarship for my research.

Education

Autonomous University of Barcelona (UAB) – Double BSc in Mathematics and Physics GPA: 8.19/10	Expected June 2027
University of Warsaw (UW) – Erasmus Student Relevant coursework: Deep Learning, Statistical Machine Learning, Big Data Mining and Processing.	Oct 2026 – Feb 2027
University of California, Berkeley (UC Berkeley) – EAP Reciprocity Student Relevant coursework: Numerical Analysis for Data Science (Honors), Discrete Mathematics Seminar (Honors), Complex Analysis (Honors)	Aug 2024 – May 2025

Experience

Computer Vision Center – Student Researcher (Barcelona, Spain) Advisor: Joost Van de Weijer Research field: Multimodal Model Merging, Continual Learning	Oct 2025 – Sept 2026
---	----------------------

[Publications]

“Rethinking Expert Training for Model Merging with Prompt Learning” (Currently under pre-print, arXiv:2607.24465) July 2026 Christos Georgakilas, Aniello Panariello, Samir El Karrat Moreno , Simone Calderara, Dimosthenis Karatzas, Joost van de Weijer Personal contributions: Designed main and ablation studies for the paper and implemented modular PyTorch pipelines for training, fine-tuning, evaluating, and merging CLIP and LLM models, enabling reproducible experimentation across multiple configurations (see the Github repository).	
---	--

QuantumDataInc (Startup) – Student Researcher (San Francisco, USA) Contributed to Yuki Nagasako’s startup through UC Berkeley SkyDeck, developing theoretical models and evaluating the technical feasibility of Quantum Key Distribution (QKD) approaches to inform product design and engineering decisions.	Jan 2025 – May 2025
Berkeley SkyDeck – ACE Intern Program (Berkeley, USA) Developed practical startup and venture-building skills through workshops and mentorship, gaining exposure to Silicon Valley VC, fundraising strategy, go-to-market, branding, and investor decision-making from practitioners including Gregory LaBlanc.	Jan 2025 – May 2025

Honors & Achievements

Elena Maseras Excellence Scholarship 2026, competitive grant awarded to pursue research at Computer Vision Center
Honors in 5 subjects (2022-2026)
Best Academic Record, Baccalaureate Class of 2022 awarded to the best score across all classes at IES Madina Mayurqa

Volunteering & Talks

ML in PL 2026 , attending sponsored by the Computer Vision Center	Oct 2026
Workshop on Multimodal Foundation Models: From Research to Innovation	July 2026
Computer Vision Center Talent Day , presented my research work	Apr 2026
Deep Learning Barcelona Symposium (DLBCN2025) , volunteered for the event	Dec 2025

Skills

Programming Languages: Python (Pytorch) & Bash
Specialized Knowledge: Vision-language models (CLIP, LLaVa), Multimodal Model Merging (Task Arithmetic, TIES, ISO-C, TSV-M, EMR), PEFT Techniques (LoRa, Prompt Learning), Transformer Architecture & LLMs (T5, LLaMa).
Tools: PyTorch, Hugging Face, wandb, Git, LaTeX & Codex.
