

Samir El Karrat Moreno | Student Researcher

Warsaw, Poland | samiriyo05@gmail.com | samirkar05.github.io | LinkedIn

I am a last year (5th year) Double BSc student in Mathematics & Physics at UAB with a GPA of 8.19/10. Computer vision researcher focusing on multimodal model merging and continual learning with over a year of experience including an excellence scholarship.

Education

Autonomous University of Barcelona (UAB) – Double BSc in Mathematics and Physics	Estimated July 2027
• GPA: 8.19/10, Top 5/20 students (not official)	
University of Warsaw (UW) – Erasmus Student	Oct 2026 – July 2027
• Relevant coursework: Deep Learning, Statistical Machine Learning, Big Data Mining and Processing.	
University of California, Berkeley (UC Berkeley) – EAP Reciprocity Student	Aug 2024 – May 2025
• Relevant coursework: Numerical Analysis for Data Science (Honors), Discrete Mathematics Seminar (Honors), Complex Analysis (Honors)	

Experience

IDEAS Research Institute – Student Researcher (Warsaw, Poland)	Sept 2026 – Present
• Advisors: Bartłomiej Twardowski & Kamil Deja Research field: Continual Learning, Generative AI	
Computer Vision Center – Student Researcher (Barcelona, Spain)	Oct 2025 – Sept 2026
• Advisor: Joost Van de Weijer Research field: Multimodal Model Merging, Continual Learning	

[Publications]

“Rethinking Expert Training for Model Merging with Prompt Learning” (Currently under pre-print, arXiv:2607.24465) July 2026
Christos Georgakilas, Aniello Panariello, **Samir El Karrat Moreno**, Simone Calderara, Dimosthenis Karatzas, Joost van de Weijer

• Contributed ideas and experiments to the paper by designing main/ablation studies and implementing PyTorch pipelines for training, fine-tuning, evaluating, and merging CLIP & LLM models with innovative training procedures.	
QuantumDataInc (Startup) – Student Researcher (San Francisco, USA)	Jan 2025 – May 2025
• Contributed to Yuki Nagasako’s startup through UC Berkeley SkyDeck, developing theoretical models and evaluating the technical feasibility of Quantum Key Distribution (QKD) approaches to inform product design and engineering decisions.	
Berkeley SkyDeck – ACE Intern Program (Berkeley, USA)	Jan 2025 – May 2025
• Developed practical startup and venture-building skills through workshops and mentorship, gaining exposure to Silicon Valley VC, fundraising strategy, go-to-market, branding, and investor decision-making from practitioners including Gregory LaBlanc.	

Honors & Achievements

Elena Maseras Excellence Scholarship 2026, competitive grant awarded to pursue research at Computer Vision Center
Honors in 5 subjects (2022-2026)
Best Academic Record Baccalaureate Class of 2022, awarded to the best score across all classes at IES Madina Mayurqa

Volunteering & Talks

Workshop on Multimodal Foundation Models: From Research to Innovation	July 2026
Computer Vision Center Talent Day , presented my research work	Apr 2026
Deep Learning Barcelona Symposium (DLBCN2025) , volunteered for the event	Dec 2025

Skills

Programming Languages: Python, C, Bash
Specialized Knowledge: Vision-language models (CLIP, LLaVa), Multimodal Model Merging (Task Arithmetic, TIES, ISO-C, TSV-M, EMR), Parameter-Efficient Fine Tuning Techniques, Prompt Learning, Transformer Architecture, Large Language Models (T5, LLaMa).
Tools: PyTorch, Hugging Face, wandb, Git, Docker, LaTeX, SLURM.
